

Experience all the ways money can be saved.

Checkout savings at discount grocery store

THERE is a local discount grocery store that stocks all the popular brands.

The Grocery Club offers customers a way to make their all important dollars go much further.

Savvy shoppers are always on the lookout for bargains, especially with purse strings being tightened due to the economic downturn.

Luxurious living may be the first thing cut out of a budget, but the one thing that remains constant is the need to shop for groceries.

The Grocery Club offers customers a way to stretch their dollars further thanks to a slew of discounted stock, saving shoppers hundreds of dollars every year.

Spending less does not have to

mean missing out on the family's favourite brands.

The discount store stocks all the popular brands found at the big chains but up to 80 per cent cheaper.

Simply put, this store is a clearance house for many supermarkets and grocery suppliers.

Fresh and new stock arrives each day, just like the other supermarkets, only this warehouse sells its products way below their regular price.

Some of the items sold have been deleted from a larger chain's inventory, are slightly damaged, are close to expiry or are part of a failed promotion.

The Grocery Club is constantly

changing, with new specials arriving on a regular basis.

With anything from popular brand yoghurt, dips, frozen fish fillets, pizza bases and frozen meals on sale at bargain prices, it is well worth paying the warehouse a visit to experience all the ways money can be saved.

Queensland's only genuine grocery clearance warehouse selling wholesale direct to the public has new specials starting every Wednesday.

The Grocery Club is at Shop 11, 345-367 Southport-Nerang Road, Ashmore. It is open 8.30am to 5pm Monday to Friday. To see what is on special this week, go to www.thegroceryclub.com.au

Simple way to save

SLASHING power bills is as easy as switching on a light, says one Australian innovator.

LED Lighting (Aust) Pty Ltd has launched a new range of high-tech solutions for homeowners, unit managers and commercial property owners faced with mounting electricity costs.

The LED lights offer power savings of up to 88 per cent on existing fluoro and incandescent bulbs with a guaranteed lifespan of at least three years.

"The savings are phenomenal," said LED Lighting marketing manager Chris Rosch.

"We've installed them in a number of high-rise buildings on the Coast and they have slashed their lighting costs to a fraction of what they were."

LED lights are emerging as the new wave in the fight against rising power costs.

"It's the simplest way to get value from your electricity bills," said Mr Rosch.

"More property owners are making the switch."

Mr Rosch said power bills in NSW had been flagged to rise 30 per cent over the next three years, and he expected Queensland to follow.

"Lighting is one of the biggest cost components of many power bills, especially for commercial consumers."

LED Lighting (Aust) has devised a calculator that estimates the power savings achieved through its LED products.

The calculator can be accessed on

LED lights help in the fight to keep power bills low.

the company's website, www.ledlightingaust.com.au

LED Lighting (Aust) offers a three-year replacement warranty guarantee on all of its LED products which are quality manufactured in Malaysia, not China as most other products in the market.

The company also will assist in accessing government grants for eligible commercial consumers.

Grants can offer dollar-for-dollar reimbursements for LED upgrades which can boost the green rating of buildings.

Do you want to save up to 88% off your lighting bill?

Simply by using the smart lighting solution, you can save money and help the environment!

- ✓ Last up to 10 Years
